

LOTINEFA™ BRAND INTRODUCTION

2024

LoTinefa's Nevaan, we designed her with our love and passion, we hope that we can bring our love and passion to you as well.

ABOUT US

LoTinefa™ is an uprising fashionable adult toy brand. We collaborate with some reputable factories in the industry such as **Jinsan aka WM Doll** etc. More importantly, we have our own R&D department to make LoTinefa™ original designs. Our brand idea is **【REAL】**, it stands for Realistic, Elegant, Artistic, Lifelike. So, in short, LoTinefa™ is R E A L.

LoTinefa™ was founded in 2022 and for less than 2 years, we already gained certain reputation among Chinese doll-lover-community and start to be known globally day by day. LoTinefa™ is not just a regular sex toy seller but a fashion-tech-based visionary entity. Our goal is to optimize human life experience, starting with dealing high-end-fashionable love dolls, and along with technology evolution, we will step into prosthetic even robot industry.

We believe that cyberpunk era will eventually come and in fact, it is partially reality now. We want to be standing with humanity, to serve human, to bring physical and mental happiness to human. We shall stay humble and grounded, we don't aim to grow big quickly but thoughtfully, we do have a solid and clear vision.

LoTinefa™ will always be there for you.

New Material S-TPE

S-TPE is Super TPE in short.

【S】 in some other planet means 【HOPE】 , but here on Earth, it means 【SUPER】 .

This new material S-TPE was developed by **Jinsan (aka WM Doll)** factory and Jinsan factory is the first factory which put S-TPE material in manufacturing.

Although the better material was used but the price remains the same.

From the year of 2024, all dolls in WM Doll series will be replacing normal TPE to S-TPE automatically when you place an order in LoTinefa Doll House the online store.

S-TPE has these advantages when comparing to normal TPE:

- 1, Better body paint is possible, more silicone-ish.
- 2, About 8 times stronger than normal TPE.
- 3, Less oil and odor.
- 4, Better resilience.
- 5, Echo friendly, recyclable.

Let us show you some screenshots from S-TPE promotion video on the next page.

The S-TPE material has significantly improved its elasticity, softness, and toughness.

JK  ×  × *Jim Sandoll*

Day 30

Durability  x8 times ↑

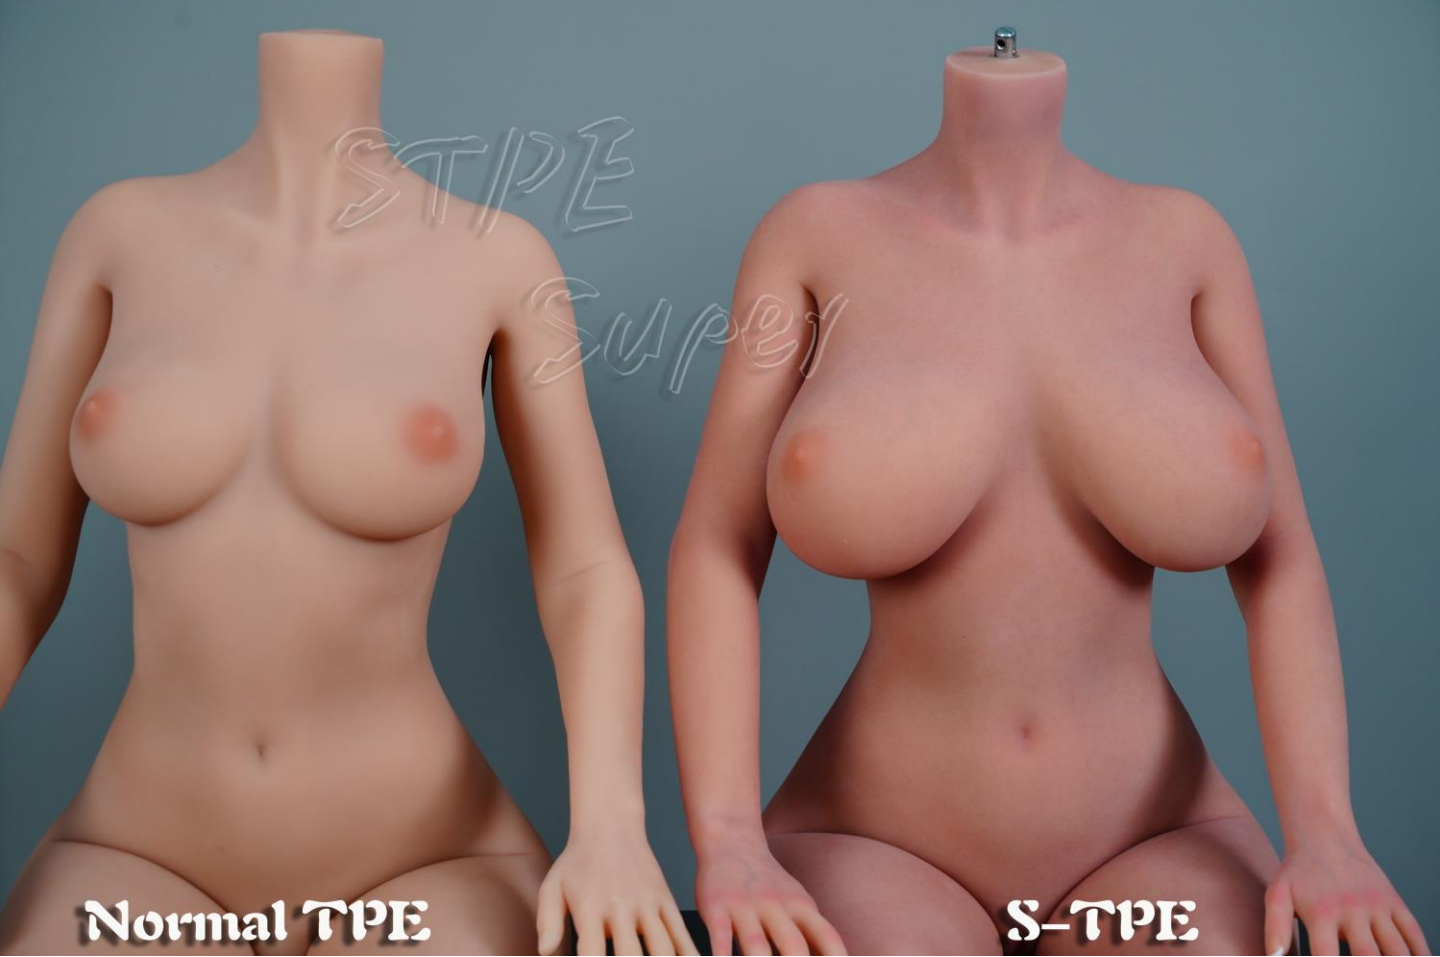

The durability of S-TPE has increased by about 8 times compared to the original TPE.

Rebound Testing

Day 3

Even at a weight of 15KG, the doll did not deform but returned to its original state.

What Makes LoTinefa™ Different?

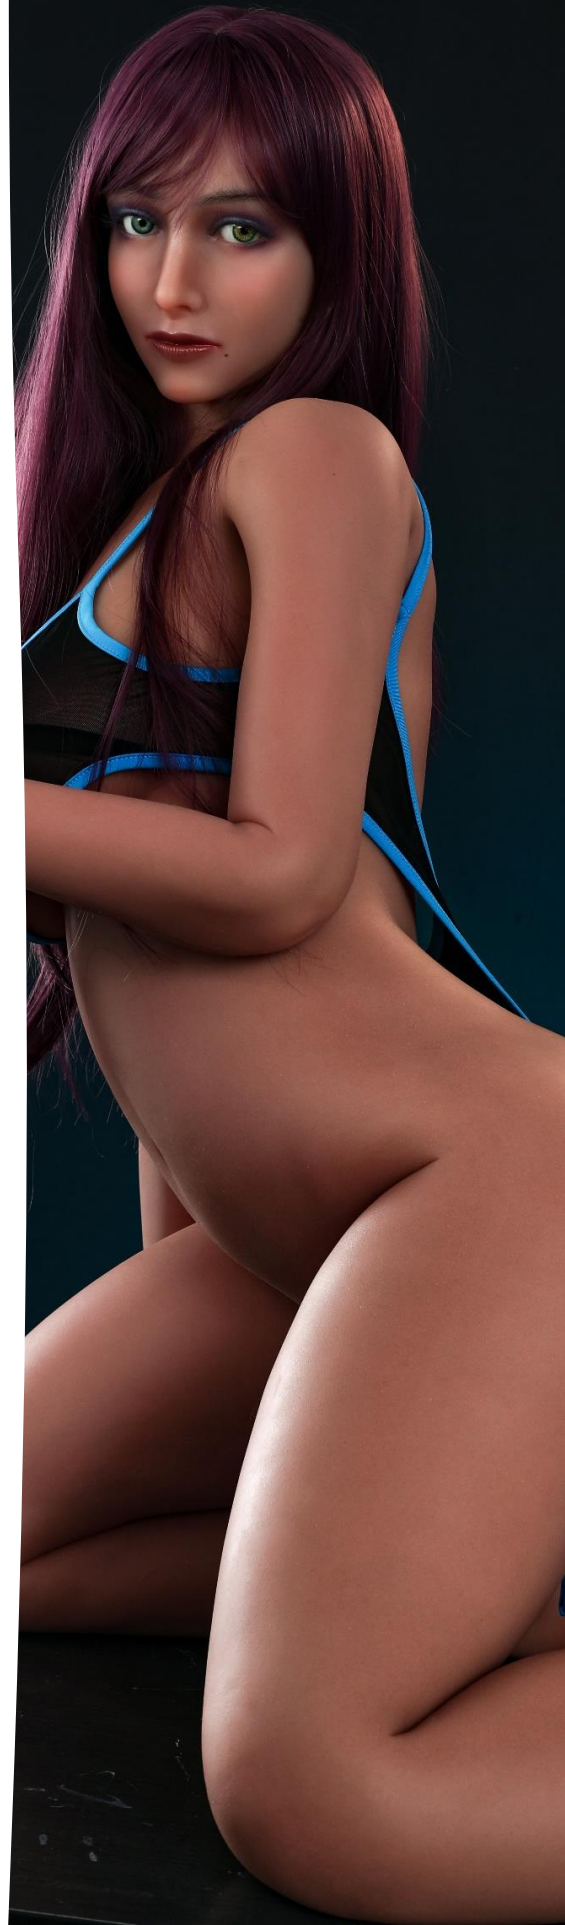

1, We have Nevaan and more original designs! We are a designer, a thinker, a trader, the most important thing is, we love what we are doing.

2, *Simplicity is the ultimate sophistication*, said by Steve Jobs and we don't doubt it even for one bit. Our online store was designed to simplify shopping process as much as we could. Although there are over **150** customizable dolls in our store, but you only need to do a few clicks to make your dream lover live.

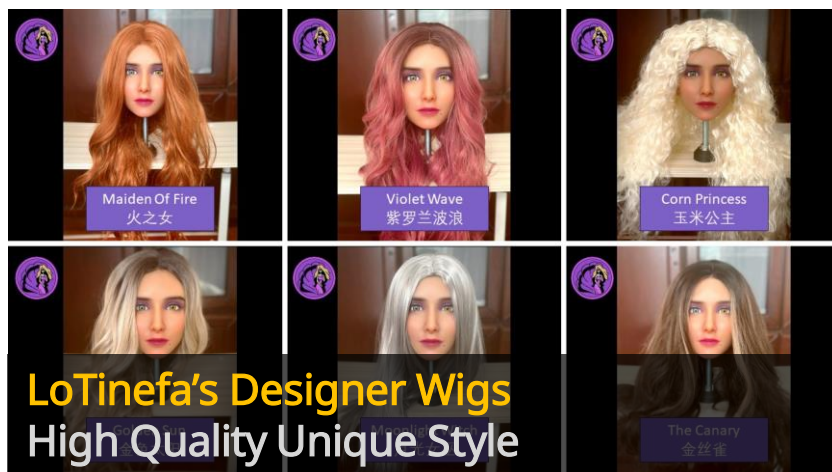

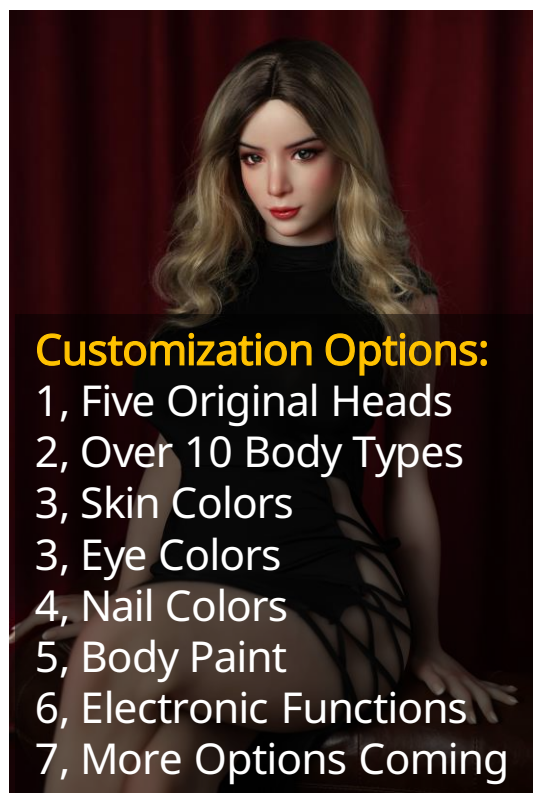

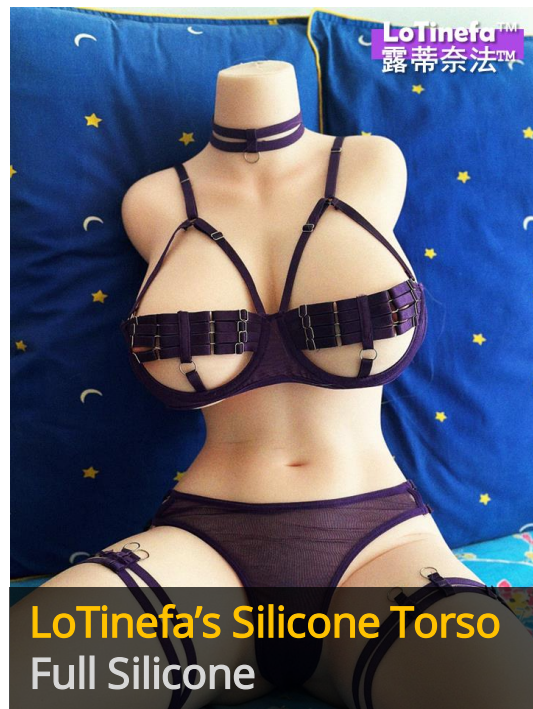

3, We are small but dedicated, unlike big companies listing thousands of products from hundreds of different brands, **we only select a few brands to partner with**, so we can visit those factories often, to know the products more, that's why we can tell everything about our products we sell.

4, We are building a **community**. Our guest can share their shopping experience and even daily life in our online chat group. It is like Garden Of Eden before Eva ate that apple.

5, We don't lie. We will tell you all **good and bad** of our goods before you buy.
